

# SENDER ADDRESS VERIFICATION

## Keep unwanted email out of your inbox!

Here's what happens when someone outside of your email community sends you an email:

- 1** The email is sent to you. Instead of going to your inbox, it is held in the Sendio Opt-Inbox™.
- 2** The sender instantly receives the Sender Address Verification email.
- 3** The sender clicks "Verify Me" and the email—and all future emails from this sender—is delivered to your inbox.
- 4** If the email sender never clicked "Verify Me," you can manually release the email from the Opt-Inbox into your inbox.
